

Minimizing Costs

When you make your initial inquiry, either by phone or visit, to In-Home Assistance the simple process of home care coverage can begin. You will be asked for specific information regarding the patient & patient's requirements so that our staff can know the exact level of care you need.

This will help us maximize your services while minimizing your costs. Because we are a referral agency, we can cut the cost of conventional health care agencies by up to 33% on privately-paid health care services.
